THE HEATING AND VENTILATING MAGAZINE

INDEX TO VOLUME V, 1908.

609224

NEW YORK:
HEATING AND VENTILATING MAGAZINE CO.
1123 BROADWAY.

A

Air Cooling, Theodore Weinshank, Jan.
ducts and registers, capacities of,—data for a heating engineer's handbook, Gerard W. Stanton, May.
distribution, fresh, Charles L. Hubbard, Oct.
leakage, effect of, around windows, on heating apparatus, H. W. Whitten, Sept.
leakage through windows, new test for, April.
movement of vitiated, Oct.
purification of, by means of ozone, G. Erlwein, Sept.
washer and humidifier, Webster, Jan.
washer, the development of the, Thomas Barwick and Sam. Kauffman, April.
washing and the Peerless air washer, Oct.
Allen, John R., coefficient of transmission in cast iron radiation, Aug.
American Society of Heating and Ventilating Engineers, Jan., March, April, May, July, Aug., Sept., Oct., Nov., Dec.
proceedings of fourteenth annual meeting, Feb., March.
proceedings of twelth semi-annual meeting, Aug., Sept.
committee on New York State factory ventilation, Oct.
committee to collect data on air washers, Oct.
annual meeting of Illinois chapter, Oct.
data wanted on steam pipe sizes, Dec.
Foundrymen's Association, April, June.
Altman & Co., heating and ventilating a modern department store, John G. Eadie, Feb.
American Society of Mechanical Engineers, March, May, June, Nov., Dec.
programme of annual meeting of, Nov.
abstract of papers read at annual meeting of, Dec.
American Society for Testing Materials, June.
Austrian coefficients for the transmission of heat through building materials, W. W. Macon, Feb.

B

Baldwin, William J., blower that humidifies and purifies air, Nov.
some interesting pipe tunnel work, Dec.
Ball bearings for fan blowers, April.
Barwick, Thomas, and Sam. Kauffman,—the development of the air washer, April.
faults in a hot water heating plant, Thomas Barwick, May.
Boiler efficiency, Walter Jones, July.
scale and its prevention, May.
settings, tubular, comparative tests of, for Chicago public schools, March.
Boilers, house heating, is the question of ratings for, possible of scientific solution, J. M. W. Kitchen, March.
horizontal tubular, and their settings, Gerard W. Stanton, June.
house heating, testing and rating, William Kent, March.
relation of heating surface to efficiency of, William Kent, March.
Blower that humidifies and purifies air, William J. Baldwin, Nov.
Blowing and drawing air through hot-blast coils, Theodore Weinshank, March.
Bolton, Reginald Pelham, effect of ventilation on the occupancy of offices, May.
exhaust steam—its place in a division of the cost of services in buildings, Oct.
new book on elevator service, May.
Boston, record of the weather in, for Dec., 1907, Jan.
record of the weather in, for Jan., 1908, Feb.
record of the weather in, for Feb., 1908, March.
record of the weather in, for March, 1908, April.
record of the weather in, for April, 1908, May.
record of the weather in, for May, 1908, June.
record of the weather in, for June, 1908, July.
record of the weather in, for July, 1908, Aug.
record of the weather in, for August, 1908, Sept.
record of the weather in, September, 1908, Oct.
record of the weather in, for October, 1908, Nov.
record of the weather in, November, 1908, Dec.
Brass manufacturers, meeting of, Toronto, July.
British Institution of Heating and Ventilating Engineers, Feb., July, Nov.
Bryan, William H., a color scheme for pipe lines, April.
identification of power house piping by colors, Aug., Sept. Discussion of, Oct.
Buyers' club building for St. Louis, a $4,000,000, April.

C

Casmey, W. H., warming and ventilation, March.
Cast iron heaters for hot blast work, Theodore Weinshank, July, Sept.
Central station heating, Schott systems of, J. C. Hornung, Nov.
hot water heating and electrical generating plant, J. D. Hoffman, Oct.

Central Supply Association, annual meeting of, Nov.
Chicago public schools, comparative tests of tubular boiler settings for, March.
record of the weather in, for December, 1907, Jan.
record of the weather in, for January, 1908, Feb.
record of the weather in, for February, 1908, March.
record of the weather in, for March, 1908, April.
record of the weather in, for April, 1908, May.
record of the weather in, for May, 1908, June.
record of the weather in, for June, 1908, July.
record of the weather in, for July, 1908, Aug.
record of the weather in, for August, 1908, Sept.
record of the weather in, for September, 1908, Oct.
record of the weather in, for October, 1908, Nov.
record of the weather in, for November, 1908, Dec.
Citadel of refuge, a, July.
Coal, evaporative tests for determining quality of, April.
Coefficient of transmission in cast iron radiation, John R. Allen, Aug.
Color scheme for pipe lines, a, William H. Bryan, April.
Committee to collect data on hot water heating, report of, Feb.
to collect data on fan blast heating, report of, Jan.
Comparative tests of tubular boiler settings for Chicago public schools, March.
Conduit, test of underground, containing hot water piping, Oct.
Consolidation of heating engineers with mechanical engineers, March, April.
Construction, the, and ventilation of a weave shed, Samuel M. Green, June.
Cooke, Morris Llewellyn, the engineer and the people, Dec.
Corrosion, relative, of wrought iron and soft steel pipes, T. N. Thomson, Jan.
Current heating and ventilating literature, Oct., Nov., Dec.

D

D. G. C. radiator valve, new, Aug.
Data for a heating engineer's handbook, Gerard W. Stanton, April, May, June.
for a heating engineer's handbook, William H. Bryan, Jan.
Development of the air washer, the, Thomas Barwick and Sam. Kauffman, April.
Donnelly, James A., effect of increased pressure in hot water heating systems, Sept.
Drying, shrinkage of wood in, May.
Drying of tobacco, Theodore Weinshank, Oct.

E

Eadie, John G., heating and ventilating a modern department store, Feb.
Eastern supply association, annual meeting of, Oct.
Effect of wind on heating and ventilation, H. W. Whitten, Oct.
of ventilation on the occupancy of offices, Reginald Pelham Bolton, May.
Electric cooking and heating, cost of, F. M. Sinsabaugh, May.
heating, W. S. Hadaway, Jr., Nov., Dec.
Engineer, the, and the people, Morris Llewellyn Cooke, Dec.
Erlwein, G., purification of air by means of ozone, Sept.
Evils and restrictions of carelessness, Feb.
Evolution in heating, J. M. W. Kitchen, Nov., Dec.
Exhaust steam—its place in a division of the cost of services in buildings, Reginald Pelham Bolton, Oct.

F

Factory ventilation law, new, for New York State, Aug.
Fan and heater arrangements, Charles L. Hubbard, Nov.
blast heating, present practice in, Jan.
Fan blowers, ball bearings for, April.
installation, an unusual, July.
single vs. double fan systems of heating and ventilating, H. L. Williams, Nov.
systems, preventing noise in, Nov.
Federal Furnace League, the, June.
First National Bank in Boston, heating and ventilating the, April.
Franklin Institute, Philadelphia, June.
Fuel economy, L. J. Wing, Jan.
guarantees for heating plants not practicable, Charles Knuth, Jr., May.
resources, the waste of our, I. C. White, May.
Furnace, a hot air, in a house without a cellar, R. S. Thompson, Aug.
heating plant, a unique, John F. Hale, Aug.

G

Gillett, Harry, underground insulation of steam and hot water pipes, Nov.
Green, Samuel M., the construction and ventilation of a weave shed, June.

H

Hadaway, W. S., electric heating, Nov., Dec.
Hale, John F., a unique heating plant, Aug.
Harvard Medical School buildings, mechanical equipment of, Boston, Jan.
Heat transmission, a method of measuring, through various materials, William Kent, March.
Heater arrangements, fan and, Charles L. Hubbard, Nov.
Heating and ventilating apparatus, simplifying the installation of, S. R. Lewis, July.
and ventilation, effect of wind on, H. W. Whitten, Nov.
and ventilating engineering, reasons why the science of should be observed, J. D. Hoffman, Aug.
and ventilating engineers, the establishment of definite fees for professional services of, Sept.
and ventilating First National Bank in Boston, April.
and ventilating a modern department store, John G. Eadie, Feb.
and ventilation of the New York City public schools, information and instruction on, March.
and ventilating literature—See current heating and ventilating literature.
and ventilation of importers' and traders' national bank, New York, Dec.
and ventilation of New York Law School, Dec.
and ventilation, single fan vs. double fan systems of, H. L. Williams, Nov.
and electrical generating plant, a central station hot water, J. D. Hoffman, Oct.
and power plant for Princeton Theological Seminary, June.
district steam, meter rate and flat rate in May.
electric, W. S. Hadaway, Jr., Nov., Dec.
engineers, consolidation of, with mechanical engineers, March, April.
engineer's handbook, data for a, Gerard W. Stanton, April, May, June.
engineer's handbook, data for a, William H. Bryan, Jan.
evolution in, J. M. W. Kitchen, Nov., Dec.
fan blast, present practice in, report of committee on fan blast heating data, Jan.
maximum economy and circulation in, J. M. W. Kitchen, July.
mechanical equipment of the Harvard Medical School buildings, Boston, Jan.
patents, information regarding vacuum, Oct.
plant, faults in a hot water, Thomas Barwick, May.
Schott systems of central station, J. C. Hornung, Nov.
systems for mills, A. G. Hosmer, June.
systems, effect of increased pressure in hot water, James A. Donnelly, Sept.
systems, hot blast, for new Freedmen's Hospital in Washington, D. C., May.
Hoffman, J. D., central station hot water heating and electrical generating plant, Oct.
reasons why the science of heating and ventilating engineering should be observed, Aug.

Shelved w. 050
Ref. 697

JUL 7 1916

Hornung, J. C., Schott systems of central station heating, Nov.
Hosmer, A. G., heating systems for mills, June.
Hot air furnace, a, in a house without a cellar, R. S. Thompson, Aug.
Hot blast coils, blowing and drawing air through, Theodore Weinshank, March.
heating system for new Freedmen's Hospital in Washington, D. C., May.
work, cast iron heaters for, Theodore Weinshank, July, Sept.
Hot water heating and electrical generating plant, central station, J. D. Hoffman, Oct.
heating plant, faults in a, Thomas Barwick, May.
heating, report of committee to secure data on, Feb.
heating systems, effect of increased pressure in, James A. Donnelly, Sept.
piping, test of underground conduit containing, Oct.
Hubbard, Charles L., fan and heater arrangements, Nov.
Fresh air distribution, Oct.

I

Ideal twentieth century house, the, April.
Identification of power house piping by colors, William H. Bryan, Aug., Sept.
discussion of, Oct.
Importers' and traders' national bank building, New York, heating and ventilation of, Dec.
Index to current heating and ventilating literature—See current heating and ventilating literature.
Insulation, underground, of steam and hot water pipes, Harry Gillett, Nov.
Iron pipe, wrought, vs., steel pipe, April.
wrought and soft steel pipes, relative corrosion of, T. N. Thomson, Jan.

J

Jaeger, John, relative capacities of pipes, May.
Jones, Walter, boiler efficiency, July.

K

Kelsey warm air generator, Nov.
Kent, William, a method of measuring heat transmission through various materials, March.
relation of heating surface to efficiency of boilers, March.
testing and rating house heating boilers, March.
Kingston Avenue hospital, Brooklyn, some interesting pipe tunnel work in, William J. Baldwin, Dec.
Kirkby, Reginald G., types of natural ventilation systems, Oct.
Kitchen, J. M. W., evolution in heating, Nov., Dec.
is the question of rating for house heating boilers possible of scientific solution, March.
maximum economy and circulation in heating, July.
Knuth, Jr., Charles, fuel guarantees for heating plants not practicable, May.

L

Lewis, S. R., simplifying the installation and operation of school heating and ventilating apparatus, July.
Lillibridge, Ray D., relative efficiency and durability of cast-iron and pressed steel radiators, Sept.
Lynd, Roy E., relative capacities of pipes, June.

M

Macon, W. W., Austrian coefficients for the transmission of heat through building materials, Feb.
temperatures for testing direct radiating systems, Oct.
Mains, sizes of—data for a heating engineer's handbook. Gerard W. Stanton, April.
Marvel thermostat, Oct.
Mechanical equipment of the Harvard Medical School buildings, Boston, Jan.
Meter rate and flat rate in district steam heating, May.
Method of measuring heat transmission through various materials, William Kent, March.
Mills, M. E., of Boston, Mass., the late John Henry, a personal tribute to, John Albert Fish, Oct.
Mine ventilation, May.
Mills, heating systems for, A. G. Hosmer, June.

N

National Association of Master Plumbers, Aug.
National Committee of Confederated Supply Associations, annual meeting of, Nov.
National Regulator Co., decision for, Feb.
National Association of Master Steam and Hot Water Fitters, March, May, June, July, Nov.
Indiana state association, May.
New York state association, May.
New York city association, May.
twentieth annual convention of, Boston, June.
proceedings of twentieth annual convention, July.
New Jersey state convention, July.
Boston local association, July.
New books. Practical Steam and Hot Water Heating and Ventilation, Alfred G. King.
Le Chauffage des Habitations, G. Debesson, Dec.
Tables for Calculating Sizes of Steam Pipes for Low Pressure Heating, Isaac Chamovitsch, Dec.
New York City, record of the weather in, for December, 1907, Jan.
record of the weather in, for January, 1908, Feb.
record of the weather in, for February, 1908, March.
record of the weather in, for March, 1908, April.
record of the weather in, for April, 1908, May.
record of the weather in, for May, 1908, June.
record of the weather in, for June, 1908, July.
record of the weather in, for July, 1908, Aug.
record of the weather in, for August, 1908, Sept.
record of the weather in, for September, 1908, Oct.
record of the weather in, for October, 1908, Nov.
record of the weather in, for November, 1908, Dec.
New York Law School, heating and ventilation of, Dec.

O

Ozone, purification of air by means of, G. Erlwein, Sept.

P

Peerless air washer, air washing and the, Oct.
Pipe lines, a color scheme for, William H. Bryan, April.
tunnel work, some interesting, William J. Baldwin.
wrought iron pipe versus steel, April.
relative capacities of, John Jaeger, May.
Pipes, relative corrosion of wrought iron and soft steel, T. N. Thomson, Jan.
underground insulation of steam and hot water, Harry Gillett, Nov.
Piping, hot water, test of underground conduit containing, Oct.
identification of power house, by colors, William H. Bryan, Oct.
discussion of, Oct.
Pittsburg, new working rules for steam fitters in, May.
record of the weather in, for December, 1907, Jan.
record of the weather in, for January, 1908, Feb.
record of the weather in, for February, 1908, March.
record of the weather in, for March, 1908, April.
record of the weather in, for April, 1908, May.
record of the weather in, for May, 1908, June.
record of the weather in, for June, 1908, July.
record of the weather in, for July, 1908, Aug.
record of the weather in, for August, 1908, Sept.

PUBLIC LIBRARY JUL 13 1916

record of the weather in, for September, 1908, Oct.
record of the weather in, for October, 1908, Nov.
record of the weather in, for November, 1908, Dec.
Present practice in fan blast heating, Jan.
Princeton Theological Seminary, heating and power plant at, June.
Purification of air by means of ozone, G. Erlwein, Sept.

R

Radiation systems, temperatures for testing direct, W. W. Macon, Oct.
cast iron, coefficient of transmission for, John R. Allen, Aug.
Radiator valve, new, D. G. C., Aug.
Radiators, relative efficiency and durability of cast iron and pressed steel, Ray D. Lillibridge, Sept.
Rating for house heating boilers, is the question of, possible of scientific solution, J. M. W. Kitchen, March.
testing and, house heating boilers, William Kent, March.
Reasons why the science of heating and ventilating engineering should be observed, J. D. Hoffman, Aug.
Registers and air ducts, capacities of—data for a heating engineer's handbook, Gerard W. Stanton, May.
Relation of heating surface to efficiency of boilers, William Kent, March.
Relative capacities of pipes, Roy E. Lynd, June.
capacities of pipes, John Jaeger, May.
corrosion of wrought iron and soft steel pipes, T. N. Thomson, Jan.
Rothschild inverted blow-off cock, April.

S

Schott systems of central station heating, J. C. Hornung, Nov.
St. Louis, a $4,000,000 buyers' club building for, April.
record of the weather in, for December, 1907, Jan.
record of the weather in, for January, 1908, Feb.
record of the weather in, for February, 1908, March.
record of the weather in, for March, 1908, April.
record of the weather in, for April, 1908, May.
record of the weather in, for May, 1908, June.
record of the weather in, for June, 1908, July.
record of the weather in, for July, 1908, Aug.
record of the weather in, for August, 1908, Sept.
record of the weather in, for September, 1908, Oct.
record of the weather in, for October, 1908, Nov.
record of the weather in, for November, 1908, Dec.
School heating and ventilating apparatus, simplifying the installation and operation of, S. R. Lewis, July.
Single fan versus double fan systems of heating and ventilation, H. L. Williams, Nov.
Spence boiler, detachable water post of, Nov.
Stanton, Gerard W., data for a heating engineer's handbook, April, May, June.
Steam, exhaust,—its place in a division of cost of services in buildings, Reginald Pelham Bolton, Oct.
heating, meter rate and flat rate in, May.
Steel pipe, wrought iron pipe versus, April.
pipes, relative corrosion of wrought iron and soft, T. N. Thomson, Jan.
Superheated steam, effect of on cast iron valves, April.
Supply associations, meetings of, Detroit, July.

T

Temperatures for testing direct radiating systems, W. W. Macon, Oct.
Tests, comparative, of tubular boiler settings for Chicago public schools, March.
Testing and rating house heating boilers, William Kent, March.
Thomson, T. N., relative corrosion of wrought iron and soft steel pipes, Jan.
Thompson, R. S., a hot air furnace in a house without a cellar, Aug.
Tobacco, the drying of, Theodore Weinshank, Oct.
Transmission, coefficient of, in cast iron radiation, John R. Allen, Aug.
Tubular boiler settings, comparative tests of, for Chicago public schools, March.
Twentieth century house, the ideal, April.

U

Underground insulation of steam and hot water pipes, Harry Gillett, Nov.

V

Vacuum heating patents, information regarding, Oct.
systems, economy of, March.
Valves, cast iron, effect of superheated steam on, April.
Ventilating apparatus, simplifying the installation and operation of school heating and, S. R. Lewis, July.
a house with cave air, C. H. Claudy, June.
heating and, First National Bank in Boston, April.
heating and, a modern department store, John G. Eadie, Feb.
Ventilation, effect of wind on heating and, H. W. Whitten, Nov.
heating and, of New York City public schools, information and instruction on, March.
heating and, of importers' and traders' national bank, New York, Dec.
heating and, of New York Law School, Dec.
law, for New York state, new factory, Aug.
mechanical, effect of open windows with, Oct.
mine, May.
single fan versus double fan systems of heating and, H. L. Williams, Nov.
systems, types of natural, Reginald G. Kirby, Oct.
the construction and, of a weave shed, Samuel M. Green, June.
warming and, W. H. Casmey, March.

W

Warming and ventilation, W. H. Casmey, March.
Washington, D. C., hot blast heating and ventilating system for the new Freedmen's hospital in, May.
Waste, the, of our fuel resources, I. C. White, May.
Weave shed, the construction and ventilation of a, Samuel M. Green, June.
Weather, record of the, in New York, Boston, Chicago, St. Louis and Pittsburg for December, 1907, Jan.
record for January, 1908, Feb.
record for February, 1908, March.
record for March, 1908, April.
record for April, 1908, May.
record for May, 1908, June.
record for June, 1908, July.
record for July, 1908, Aug.
record for August, 1908, Sept.
record for September, 1908, Oct.
record for October, 1908, Nov.
record for November, 1908, Dec.
Webster air washer and humidifier, Jan.
Weinshank, Theodore, air cooling, Aug.
blowing and drawing air through hot blast coils, March.
cast iron heaters for hot blast work, July, Sept.
the drying of tobacco, Oct.
Whitten, H. W., effect of air leakage around windows on heating apparatus, Sept.
effect of wind on heating and ventilation, Nov.
Williams, H. L., single fan versus double fan systems of heating and ventilation, Nov.
Wing, L. J., fuel economy, Jan.
Winter, of 1907-1908, the, June.
Wood, shrinkage of, in drying, May.
Wrought iron pipe versus steel pipe, April.
iron and soft steel pipes, relative corrosion of, T. N. Thomson, Jan.
